Entity-Based SEO Framework

	B	C	D
	Steps	Topical Map Steps	Explanation
	Step 1	Define the source context properly	Ultimate Offer to your target audience (Monetary or Non-monetary)
	Step 2	Find the central entity/entities	To represent the main Topic of the website, we need a representative Entity
	Step 3	Define the central search intent	The overall needs & intents of our target audience that will be responded on our website
	Step 4	Define the core section topics.	All attributes of Central Entity related to Source Context
	Step 5	Define the outer section topics.	All attributes of Central Entity other than those covered in the Core Section
	Step 6	Research Target Audience and Buyer Personas	Topic/Niche Understanding
	Step 7	Read Wikipedia Page (and other wiki resources and expert resources), Connected Pages, And List Relevant Entities And Attributes	
	Step 8	Research based on LLMs (chatgpt, claude, gemini, grok, etc)	
	Step 9	Research the Knowledge Domains, Contextual Domains, and Contextual Layers	Understand the Query Templates & singular contexts/intents of target audience
	Step 10	Find Lexical Relations	Understand how topics are connected in this niche/industry
	Step 11	Find Ontologies and Taxonomies	Understand how topics are arranged in this niche
	Step 12	Analyze the Topic Based on Frame Semantics	Understand what are the overall contexts in your niche/industry
	Step 13	Check Query Semantics from Query Networks (Query Path, Correlated, Co-occurring & Sequential Queries, etc.)	Understand the User Intents & Contexts from Query Networks
	Step 14	Find Query Templates and Contextual Layers	Understand how contexts & intents are elaborated by the audience
	Step 15	Perform SERP Analysis (Auto-suggestions, PAA, PASF, Search Results, Meta Descriptions, Knowledge Panels)	Check Entities/Attributes, Topics/Sub-topics, Contexts, User Intents
		Research Based on other Search Engines and Forums
